IMPORTANT NOTICE TO PERSONS WITH ON-SITE SEWERAGE TREATMENT SYSTEMS

To improve the water quality in St. Tammany Parish, and ultimately the Lake Pontchartrain Basin, existing on-site sewage disposal systems will now be inspected by the St. Tammany Parish Department of Environmental Services.

Effective May 19, 2002, homes, apartments or businesses in unincorporated areas of St. Tammany Parish with on-site sewerage treatment (septic tanks or aerobic treatment units) must have a Sewerage Inspection Permit before a connection or transfer of electrical power will be made.

Inspections of existing on-site sewerage disposal systems will be made to assure that they are not causing a public health or environmental problem. If the inspection reveals that replacement or repair of the system is required, a Sewerage Inspection Permit will not be issued until the replacement or repair is complete.

Most Septic tank systems must be replaced with a new Aerobic Treatment Unit before a Sewerage Inspection Permit will be issued.

Proof that the sewerage system has been pumped (by a licensed pumper) within the last two years must be provided.

Sewerage Inspection Permit applications, along with the \$25.00 permit fee, will be accepted at the following locations beginning April 21, 2003:

St. Tammany Parish Building Permit Office
520 Old Spanish Trail, Suite 300
Slidell, LA

or

St. Tammany Parish Department of Environmental Services
21454 Koop Drive; Suite 2F
Mandeville, LA

Anyone with an on-site sewerage disposal system who is anticipating a change of electrical connection is urged to apply for this permit as soon as possible. Sewerage Inspection Permits will be good for one year.

For further information regarding this program, please contact St. Tammany Parish Department of Environmental Services at 985-898-2535.

Please Note: This inspection program will not change any building permit procedures. Homes, apartments or businesses with sewerage systems under one year old will not require an inspection.
